Converter

version 1.1

by Umberto Degli Esposti

The program allows you to convert different measure units, choose between several categories.

To run the program you need the Microsoft .NET 2.0 framework. This software is already installed on recent Windows and it will be even in the next version.

You can download it from Microsoft website.

The component you have to download is "**Microsoft .NET Framework Version 2.0 Redistributable Package**".

<http://www.microsoft.com/downloads/details.aspx?FamilyID=0856eacb-4362-4b0d-8edd-aab15c5e04f5&displaylang=en>

The program doesn't need to be installed, you can copy the file program in a directory on the disk and execute it.

Insert the value to be converted, select the category and the measure unit. The grid will show the conversions for the whole category's units.
